### About Me

Light-hearted and humorous guy who likes to see the funny side of even the darkest things—even if that just means the terminal UI. On a more serious note, I'm adaptive, persistent, and have well-developed soft skills honed by my previous career.

## 🧠 SKILLS

### Soft Skills

Team management 📌, project management, Agile (Scrum), public speaking 📌, problem solving

### Languages

C, C++, R, Python, TypeScript, SQL

### Security

NIST, GDPR 📌 and FAIR

### Continuous

### Integration/Continuous Development (CI/CD)

GitHub, git

### Webdevelopment

FastAPI, Flask, React.JS, Node.JS

### AI/ML

PyTorch, OpenCV, GPT4All

## 🎓 EDUCATION

### Junior Software Developer, Hive Helsinki 📌

2023 - 07/2025 | Helsinki, Finland

Hive Helsinki is a peer-to-peer education doing projects. There I worked on individual and group assignments in an environment that simulates professional life. During my studies there I focused a lot in testing and documentation.

**Skills developed:** team management, documentation writing, peer-to-peer learning/teaching, version control, project management, C, and C++.

### Master of Science in Political Science, Leiden University 📌

2020 - 2022 | Leiden, The Netherlands

In Leiden I have focused my studies in analyzing data from terrorist groups to understand the correlation between trust and incidence of terrorist attacks.

**Skills developed:** R, analytical thinking, quantitative methodology, moral theory, and data analysis.

## 📁 PROJECTS

### Webcrawler, written in Python 📌

05/2025 - 06/2025

This is a crawler bot that retrieves companies logos in CSV format. It operates in a similar fashion as GPT, Google, and other crawler bots that indexate websites. This was done with minimal external libraries and depends mostly on built-in libraries.

### ft\_transcendence, written in TypeScript 📌

03/2025 - 05/2025

A website for a pong contest. This is a full stack project focused on building front and backend in a containerized environment with RESTful API communication between both ends. The stack for this project was: TypeScript, React, Tailwind CSS, SQLite3, Docker, and Node.JS.

### ft\_irc, written in C++ 📌

12/2024 - 02/2025

Together with other two teammates we have developed an IRC server that is client compliant (irssi). My specific parts of the project was setting up the server to connect to other users, some of the basic commands, and the documentation in our GitHub wiki.

### Minishell, written in C 📌

2024

The team replicated core parts of Bash. To summarize, this would be the same as replicating what we call CLI (Command Line Interface), also known as *terminal*.

---

## PROFESSIONAL EXPERIENCE

---

### **Podcast Producer, Bem-Estar Capital**

2019 - 2023

Skills developed: public speaking, team management, time management, script writing, fundraising.

Served as the anchor and producer for over 21 podcast episodes, interviewing professionals from diverse fields, including politicians, activists, journalists, diplomats, and judges. Took full responsibility for scripting questions and debate points for each episode, conducting in-depth research on topics and guest profiles. The podcast's potential was recognized and has been funded by the Neoliberal Project since 2020. The Neoliberal Project is affiliated with the Progressive Policy Institute, a prominent think tank based in Washington, DC.

### **Political Analyst, SDP**

07/2022 - 08/2022

Skills developed: report and documentation writing, communication in different languages, translation (documented and live).

Helsinki, Finland

Authored a detailed report on the 2022 Brazilian Elections, leveraging expertise on the subject. Contributed to translating the Finnish version of the SDP website into English, providing insights on prioritizing sections most relevant and urgent for non-Finnish speakers.

### **Executive Assistant, Rio Grande do Sul state government**

02/2018 - 01/2020

Skills developed: team leadership, multilanguage communication, event organization, protocol, problem solving.

Porto Alegre, Brazil

Managed official ceremonies for the Governor of Rio Grande do Sul, coordinating protocol and formalities for events attended by politicians and various stakeholders. Led a team of 5-10 interns as Head of Junior Staff, supervising and providing guidance on proper protocols for daily events.

### **Acquisitions Manager, EPI Energy Projects Inv. Ltd.**

01/2016 - 01/2017

Skills developed: negotiations in international setup, inventory keeping, department scheduling, intradepartmental communication.

Porto Alegre, Brazil

Oversaw the importation of solar panels from international suppliers, managing negotiations, logistics, and documentation for purchases. Responsible for negotiating, maintaining, and updating supply prices on a monthly basis. As a result, the company switched their EV panels and reduced costs by 30%.
